L-Level Telemetry system

The company has successfully designed and developed i-Level Telemetry system, with best in class to convert data into real-time information

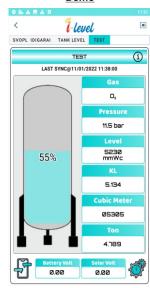

Features

- ★ Cost effective and easy to install
- ★ Available Android and iOS based apps
- ★ API with existing software
- ★ Set your Re-order level & alerts for timely Re-order schedule
- ★ Set the data interval time
- ★ On site Display Screen with Telemetry
- ★ Remotely monitor
- ★ Power Supply 230V AC / Solar
- ★ Communication with Cloud Server through IoT
- ★ Multi-users/Groups can be used.
